GAUTAM KUMAR

Data Analyst — Data Engineer — Data Scientist

(+91) 9264420901 — gautamtech.geu@gmail.com — LinkedIn — GitHub

Summary

Data professional with 1+ year of experience in ETL pipelines, data quality automation, and analytics on 25GB of daily data using SQL, Python, PySpark, and AWS/GCP. Also experienced in pricing analytics, machine learning, and LLM-based analytics.

Experience

Anakin (YC S21) – Data Quality Analyst Aug 2025 – Present
Pricing intelligence platform — Bengaluru

- Validate **25GB of daily scraped pricing data** from AWS S3 and BigQuery using SQL, Python, and PySpark for e-commerce, quick-commerce, food delivery, and ride-hailing clients.
- Designed **30+ automated DQ rules** across ETL pipelines for accuracy, completeness, and consistency, cutting data mismatch rate from **20% to 2%**.
- Created a **DQ configuration framework** with P0/P1 column priorities, fill rates, and tolerance thresholds from historical data.
- Developed scripts for **competitor coverage analysis** and **price benchmarking**, plus a monthly vendor monitoring tool with Slack alerts.
- Investigated **50+ DQ issues monthly** through profiling and root cause analysis; automated S3 extraction with boto3, cutting manual effort by **40%**.

Projects

DataMind AI – AI-Powered Data Analytics Platform — Live Demo Aug 2026 – Present
Python, FastAPI, DuckDB, Pinecone, Ollama (Qwen2.5, bge-m3), OpenAI API, React, Recharts

- Developed a full-stack platform that ingests **CSV, JSON, NDJSON, Parquet, and PDF** files, queries data with DuckDB, and auto-profiles each upload for duplicates, column roles, and quality status.
- Engineered a **Text-to-SQL engine** on a pluggable LLM layer (Qwen2.5, OpenAI) with SELECT-only validation, column checks, row limits, and an **LLM self-repair loop**.
- Implemented a **PDF RAG pipeline** using page-aware chunking, bge-m3 embeddings, Pinecone vector search, and custom re-ranking for source-grounded answers.
- Added conversation memory and **automatic chart selection** (bar, line, pie) to a React and Recharts dashboard.

Ride-Hailing Price Intelligence Pipeline
Python, Pandas, PySpark, EDA

- Cleaned and analyzed **2.3M rows** of Uber, Ola, and Rapido data; normalized vehicle categories, removed outliers, and trained a fare prediction model.

Pallet Demand Forecasting using Machine Learning — GitHub
Python, Scikit-learn, Time Series Analysis, Streamlit

- Compared Regression, ARIMA, LSTM, and FBProphet models for demand prediction; delivered a Streamlit app for inventory planning.

Skills

Languages & Analytics: Python, SQL (Window Functions, CTEs), Pandas, NumPy, EDA, Power BI, Tableau, Advanced Excel, Statistics, Hypothesis Testing, A/B Testing
Data Engineering & Cloud: ETL Pipelines, PySpark, Databricks, Airflow, Docker, DuckDB, Parquet, REST APIs, AWS (S3, boto3), GCP (BigQuery), Git, Jira
Data Quality & Pricing: DQ Rules, Data Validation, Profiling, Reconciliation, Root Cause Analysis, Anomaly Detection, Price Benchmarking, Competitive Intelligence
Machine Learning: Scikit-learn, Supervised & Unsupervised Learning, Regression, Classification, NLP, Time Series (ARIMA, LSTM, FBProphet), Feature Engineering, Streamlit
AI: LLMs, RAG, Text-to-SQL, Embeddings, Vector Databases (Pinecone), Ollama, FastAPI

Education

Graphic Era Deemed to be University, Dehradun Aug 2023 – Jun 2025
Master of Computer Applications (MCA), GPA: 8.1

Certifications & Publication

Google Data Analytics (Coursera, 2023); Data Science & AI (UTM Malaysia, 2023); Power BI & Data Science using Python (360DigiTMG, 2022–23). Research paper published at the 6th World Congress on Disaster Management.
